Work Experience

NSWC Carderock Division | Computer Scientist | Carderock, MD *February 2025 - Present*

- Maintainer for a Fortran-based physics simulation software supporting submarine Maneuvering and Control Simulations (MCSIM), collaborating within a small engineering team while independently delivering software improvements.
- Developed a C-based TCP/IP communication interface using Fortran-C interoperability to integrate hydrodynamic simulation software with a tactical training system designed for submarine pilot instruction improving the quality and reliability of the current and future pilots.
- Communicated directly with stakeholders when researching and developing new prediction algorithms, and performed a technical analysis and report.

FINRA | Junior Developer Intern | Rockville, MD *June 2023 - August 2023*

- Developed, maintained, and executed automated and manual test cases, supporting API functionality, reliability, and software quality.
- Analyzed and migrated existing .NET automated tests to a Java-based testing framework using Cucumber and REST Assured.
- Conducted REST API testing and response validation using Postman, documenting and comparing API response discrepancies in Excel to identify inconsistencies and support troubleshooting.

FINRA | Junior Developer Intern | Rockville, MD *June 2022 - August 2022*

- Collaborated within an Agile development team to design and develop a matter management database, supporting the modernization and replacement of a legacy software system.
- Researched, evaluated, and tested API testing tools and frameworks to assess their suitability for integration into future development sprints and testing workflows.

Projects

Hash Classification | Malware Analysis *May 2024*

- Utilized the Python tensorflow library to create a convolutional neural network to classify malware to its respective family based on their similarity hash using the Trend Micro Locality Sensitive Hash (TLSH).

Ray Tracer | Computer Graphics *March 2024*

- Developed a ray tracer from scratch with functioning shadows, reflections, stratification, smoothing, and depth in C++ from a NFF file input.

Skills

Programming	Bash, C, C++, Fortran, Java, Python, SQL
Operating Systems	Linux, Mac OS, Windows
Software	Confluence, Git, IntelliJ, Jira, Microsoft Office Software, Postman, Visual Studio

Education

University of Maryland Baltimore County | Baltimore, MD *May 2024*

- Bachelors of Science in Computer Science – Data Science & Machine Learning
- Cello Performance Minor
- GPA: 3.6
- Awards: Cum Laude
